Lock Hardware & Access Control

Security Solutions Simplified

Rolland Safe & Lock Company was founded more than 105 years ago as a global manufacturer, distributor and service provider of security safe and lock systems. Rolland supports these products and services 24/7, 365 days a year with a national network of safe and lock technicians *“Delivering Security with Inspired Service.”*

Lock hardware and the supporting ongoing lock service technicians are a critical component of any security program. Rolland Safe & Lock Company can maintain and maximize the consistency of your security standards by analyzing your overall security needs and recommending the best lock program available that meets your needs.

We offer a wide array of tailored commercial security solutions:

- **Door Hardware Solutions**
- **Management of Key Control Programs**
- **Electronic Access Control**
- **Turnkey Security Solutions**
- **Camera Control Systems**

Interchangeable Cores (IC) & Restricted Keyway Locks

IC cores are simplicity in standardization that can configure one door at a time with a variety of keyed systems from master to restricted keyways created for multiple management access.

- Available for all types of door hardware
- Quick rekeying without lock removal or disassembly
- Instantly resecurer facility when cores are replaced
- Reduces ongoing service cost of outside locksmith and number of keys
- One stop shop for point of contact and back office management
- Standardization and simplicity ensures your key system's integrity

Cylinder & Mortise Locksets

Cylinders and mortise locks, from high security to standard or IC core, are manufactured to precision tolerances and the highest quality standards. These type of locks are available in deadbolt, lever, and door knobs.

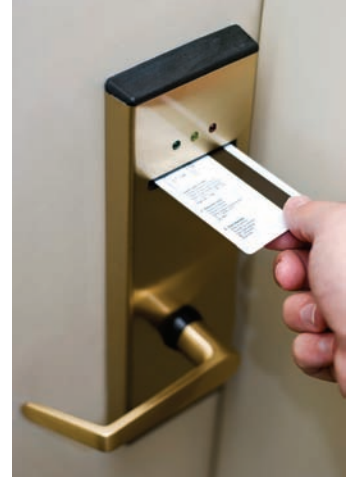

- Reversible and non-handed options available
- Numerous designs and handle finishes
- Offered in residential or commercial use
- Waterproof models

Access Control & Keypad Locks

Reduce the amount of keys to keep track of electronic access, control systems are easily programmed to keep you secure at all times and manage access by person, time, or date.

- Wireless and WiFi models available
- Pushbutton or card options
- Easy to retrofit to cylindrical & mortise locks
- Fully programmable onsite
- Tamper and vandal resistant

Electric Door Strikes, Deadbolts & Maglocks

Electric bolt locks are compatible with virtually any access control system.

- Electric door strikes available in fail-safe and fail-secure modes
- May be coupled with any cylinder, mortise or push bar type lock with free egress feature
- May be surface mounted on the push or pull side of the door opening
- Can be mounted in vertical or horizontal position
- Maglocks require the issuance of a permit and have no moving parts that wear out

Camera Security System

There are multiple options in all categories that offer you real time recording a crystal clear image.

- Systems for reviewing, recording & playing back
- May be remotely monitored from your business or home
- Wired or wireless with back up battery

Panic Bars, Exit Devices, and Alarms

Programmed to meet all fire codes. Rim and vertical options give you what you want – reliable, tough protection with low maintenance and multiple finishes.

- Available in UL Listed for exit and UL fire-rated for exit
- Heavy duty cases protect and resist tampering & vandalism
- High and low traffic options
- Battery and/or AC powered

Door Closers

Door closers are designed to meet commercial marketplace requirements, from common installation to intelligent door closers, that continuously monitor door position, resistance, opening and closing needs.

- Multiple options compliant with barrier-free codes
- 3-way installations available
- Adjustable sweep/latch speeds
- Recessed floor and header options available
