PS-8 Mini

Specifications

The PS-8 Mini is an 8 drawer safe insert designed to give an added layer of premium protection in any safe.

8 steel drawers are protected by 1/8" steel sides and back.

In addition, the safe offers armed robbery protection through advanced time-delay security which prohibits drawers opening all at once.

Time Delay Security

Drawers can be individually programmed to open from 5 seconds to 60 minutes. Only one drawer can be opened at a time.

The option of time delay override programming is available on the PS-8.

Capacity

8 uniformly-sized, large capacity steel drawers hold a sizeable capacity of small valuables or up to 500 pawn ticket envelopes.

Users

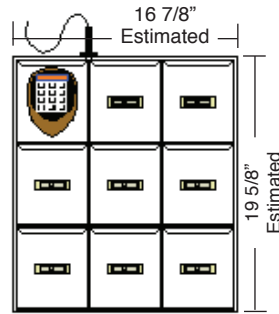

The programmable time-delay system allows electronically controlled access for up to 8 users with audit capability for up to 2000 events.

Lock Operation Backup

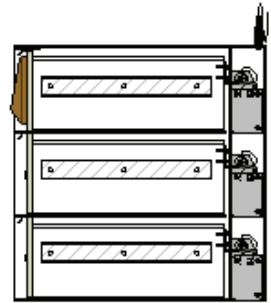

The electronic digital lock will operate on 120 volts with battery backup in case of power failure.
